Are you thinking of renovating or building your dream home? After learning the latest technology at BCIT in the Interior Design program, Monique Salchenberger has joined Dogwood Flooring. Come into the Showroom for assistance with colours, design and tips on how to make your home a place you love!

Tips

Before renovating or building, investing in design will save you money in the long run.

Sketchup is a program that will allow you to see how the colours and finishes will look before you start. (sample room above)

Find an inspirational photo that makes you feel good. Use elements and principles of design like, colour, texture, shapes, balance, emphasis, harmony & variety to create the mood.

Purchase sample paint to test on all walls during different times of the day before investing in gallons of paint. Try Benjamin Moore's Kendall Charcoal with Beacon Hill Damask (see photo in right corner)

Use apps like Floorvana by Shaw Floors to try colours in your room.

Trends

Use wallpaper for an accent wall - many more options available today.

Use Hardwood flooring for longevity or Vinyl plank for waterproofing.

Create multi purpose spaces (using your dining room as an office).

Add layers of lighting with floor & table lamps or update with smart fixtures and change light bulbs to LED with dimmable switches.

Bring the outdoors inside using plants with decorative pots or living walls. (bynaturedesign.ca)

Add texture and colour with throw pillows and curtains for window treatments.

Use neutral colours for flooring and add colour with area rugs, paint, tile, furniture, window treatments and accessories.
